# About Us

## Experience Haus

Experience Haus provides applied learning courses for organisations and individuals covering an abundance of different digital expertise. We offer practitioner taught technical skills training for high demand disciplines such as Marketing, Product Management, Experience Design and User Research.

Crucially, the company goes above and beyond the purely technical and hopes to uncover the black holes in business. The company's offering of events, part-time courses (pairing students with start-ups) and hands-on workshops intends to bridge the gap between economical and accessible learning for the curious.

As of August 2018, Experience Haus proudly became a part of the Matter Of Form Group. Classes and workshops are held in our studio in Shoreditch.

# Our Ethos

## Learn by Doing

We'll cover the concepts, but also demonstrate the exercises and methods that are used daily by teams to push products forward and make sure they'll succeed and stand out.

Attendees of Experience Haus workshops and bespoke programs will enjoy a mix of lectures and workshop time, where they will get to practice these methods and apply them to real world examples. In our part-time courses, for example, our students are paired with local startups. In accelerator/incubator training learning is immediately applied to the attendees startup.

In order to encourage discussion and collaboration we aim to limit our B2C and B2B workshops to no more than 15 students, and our part-time courses are limited to 10 students.

“

*The Product Design (UX/UI) course is perfect for anyone who is looking to add digital product design skills to their existing skillset.*

*In order to encourage discussion and collaboration we limit our class sizes to 10 students.*

# Product Design inc. UX & UI

## About the course

During the course we will cover a variety of topics including research tactics, design thinking, stakeholder management, product management and user experience (UX) – all of which play an important role in making successful design decisions. The course is taken part time over twelve weeks, two evenings a week, typically on a Monday or Wednesday / Tuesday or Thursday. Students will enjoy a mix of lectures and workshop time, where they will get to practice these methods and then apply them to their projects.

Learn how to visualise solutions rooted in research and user testing. Students will learn how to implement best practices, conventions, and the latest design trends and patterns into their work. Also work through the differences and nuances of responsive design, hybrid and native apps as well as current design languages and principles.

The part-time course features a client project with a local startup, which students work on independently. Students deliver a presentation summarising their journey, process, and work throughout.

# Who Should Attend?

## Who is it for?

The course is perfect for anyone who is looking to add digital product design skills to their existing skillset.

Previous students include account managers, front-end developers, graphic designers and brand consultants.

Although there are no pre-requisites to take the course, having a keen interest in design definitely helps. There is no need to have any knowledge of particular software as you will be taught everything along the way.

# Who Will Be Teaching You?

## Our Instructors and Mentors

Our wealth of hands-on workshops and courses aims to connect professionals with current practitioners in the industry culminating our philosophy: learn by doing. We work with an extensive network of 50 hands-on instructors.

Our product and business development workshops have been designed to ensure that attendees are able to apply their learnings right away in their respective jobs and companies. Our instructors have worked with various sized teams, from small startups to leading agencies such as Huge, Matter Of Form, ustwo and more.

Our marketing and personal development courses have been designed by industry leading experts with over 40 years' experience. They have been lecturers at a number of European universities, lead workshops at large corporations like Google and Amazon, and have built respected agencies and companies.

## Bookings

Book [online](#) or call +44 203 141 2010

## Cost

£1,950 - £2,165 (inc. VAT) per student

## Payment Options

OPTION 1 £1,950	A single upfront payment of £1,950
OPTION 2 £2,165	A deposit of £216.50 (inc. VAT) followed by 3 direct debit instalments of £649.50
OPTION 3 £1,950	Company invoice payment

# Course Information

## Location

### Where are classes held?

Experience Haus

Floor 3

168 Shoreditch High Street

London. E1 6JE

United Kingdom

“

”

*I wanted to become a UX/UI Designer. I know this sounds very salesman-like, but if it wasn't for the course, I wouldn't have been able to share my UX research and design process during my job interviews, talk about what I did like user interviews, usability testing, and interface design.*

*I wouldn't stand a chance with only presenting the work I did in uni, and certainly wouldn't have landed my UX design job.*

Alvin Chan  
UX Designer, nitro design
